MURAD HUSEYNOV

Founder, Entrepreneur, Software Engineer

@ muradace@gmail.com +49 170 2052525 Berlin, Germany in muradiodev muradiodev

Founder and **entrepreneur** focused on turning ideas into products and scaling teams. I build companies from the ground up—product vision, go-to-market, and execution—and lead cross-functional teams to deliver. Strong in **product thinking**, **strategy**, and **getting things done**; technical background enables me to ship and iterate fast.

WORK EXPERIENCE

Founder

Hubpoint.Ai
02/2025 – Present Berlin, Dubai

- Brought an AI-powered scheduling and business management platform for SMBs from concept to live production, owning architecture, product, UX, billing, and go-to-market.
- Head four functions (Engineering, Product, Marketing, Sales) and a 15-person team; define strategy, drive execution, and hit delivery targets.
- Established the technical foundation (Flask, PostgreSQL, React, Vite, Docker) for scalability, security, and enterprise use.
- Delivered AI-powered scheduling with NLP-based intent detection, conflict resolution, and workflows that support both automated and manual planning.
- Rolled out the full operations stack: auth, subscription tiers, Stripe billing, events, QR ticketing, analytics, and PDF/Excel exports; kept quality high with automated and load tests, CI/CD, and API monitoring.
- **Achieved:** Product in production, team scaled to 15, platform built for EU and MENA as an AI-powered scheduling and business management tool.

Tech Lead

Capgemini
11/2023 – 12/2025 Frankfurt am Main, Germany

- Built a web app for knowledge and information management and integrated GenAI to improve search and retrieval.
- Delivered a responsive UI and a Python-based REST API backend.
- Implemented the backend in Flask with local and cloud AI models for GenAI features.
- **Achieved:** Knowledge management platform with GenAI-powered retrieval and a stable, maintainable stack.

Senior Software Engineer

Axitera GmbH
11/2022 – 11/2023 Frankfurt am Main, Germany

- Delivered the cloud workforce management product Obolus: HR time tracking, corporate benefits, and travel expense management.
- Built microservices and Excel export endpoints for monthly reporting.
- Configured test environments, added test coverage, and resolved defects to raise product quality.
- **Achieved:** Shipped Obolus with core HR and expense features and reliable reporting.

SKILLS

- **Programming Languages:** Java, Python, SQL, JavaScript, TypeScript
- **Frameworks & Libraries:** React, Vite, Spring Boot, Flask, Vue.js, Bootstrap, Thymeleaf
- **Tools & Technologies:** Docker, Kubernetes, Git, GitLab CI/CD, Redis, RabbitMQ, Kafka, Stripe, Jira, Confluence, Swagger, Postman, Insomnia, Artillery
- **Databases:** PostgreSQL, pgvector, Elasticsearch
- **AI & Integrations:** LLM integration, Hugging Face, NLP, intent recognition, AI reasoning
- **Testing & QA:** JUnit, Mockito, Selenium, contract tests, automated testing, load testing
- **Cloud & DevOps:** AWS, Jenkins, Maven, Firebase, Cloudflare, CI/CD pipelines
- **Other:** REST, Microservices, SCRUM/Agile, Clean Code, UML, Linux, subscription billing, event management
- **Soft Skills:** Team Leadership, Project Coordination, Business Analysis, Communication, Problem Solving

PROJECTS

Development of Gen AI Explore

11/2023 - 04/2024

- Developed a web-based application for knowledge management using advanced GenAI technologies.
- Created a responsive UI with Vue.js and Bootstrap.
- Built the backend REST API using Flask in Python, integrating local and public AI models.

Development of Obolus HR Management Solution

11/2022 - 10/2023

- Designed and implemented the Obolus web application, including microservices for scalability and flexibility.
- Created Excel export endpoints for monthly accounting reports.
- Set up test environments, implemented

Part-time Software Engineer

Hacon - A Siemens Company

03/2022 – 10/2022 **Hannover, Germany**

- Added new microservice modules and implemented tests across the codebase.
- Worked on public and private transport systems handling 100M door-to-door route calculations per day.
- Supported the implementation of the German Government 9-euro ticket decision process.
- **Achieved:** Delivered microservices and tests for high-scale routing; supported a major public policy rollout.

Java Software Engineer

Centogene AG

10/2018 – 10/2019 **Rostock, Germany**

- Wrote and maintained unit tests and refactored code for CentoMD and CentoMDx.
- Built a web application with Java 8, Spring Boot, MySQL, JUnit, and JavaScript.
- Contributed to systems aggregating phenotype and genotype data to support treatment recommendations for clinicians.
- **Achieved:** Improved test coverage and reliability of medical software; delivered a production web system.

Java Software Engineer

The State Statistical Committee of the Republic of Azerbaijan

08/2014 – 08/2017 **Baku, Azerbaijan**

- Delivered government systems in the Statistical Programming Division: monthly and annual web applications for statistical data.
- Implemented SQL in Java to export outputs to PDF, XLS, and WebView.
- Built a population index used for inflation rate calculation.
- **Achieved:** Shipped production systems for national statistics and inflation measurement.

EDUCATION

M.Sc - Information Technologies

04/2018 – 09/2022

Rostock University Electrical Engineering and Information Technology

M.Sc - Information Technologies

09/2016 – 03/2018

Azerbaijan State Oil and Industry University Electronics and Telecommunication Engineering

B.Sc - Information Technologies

09/2012 – 06/2016

Azerbaijan State Oil and Industry University Electronics and Telecommunication Engineering

HOBBIES

Entrepreneurship | Startups | Conceptualizing product ideas | Traveling | Cooking | Healthy Lifestyle | Reading | Music | Outdoor activities

Backend for Mobile Application (EvenTeam LLC — Startup)

08/2021 - 02/2022

- Analyzed project requirements, coordinated with customer contacts, and developed microservices (9 modules) for the backend.
- Created unit tests, optimized existing code, and ensured maintainability, scalability, and performance.
- Facilitated communication between engineers and the design agency, focusing on a homogeneous architecture using Java Spring Boot and other cloud technologies.

Development of Travel App Backend

03/2022 - 11/2022

- Developed microservices to enhance the flexibility of the web application.
- Automated build and deploy processes and integrated Chef Server API for system management.
- Implemented monitoring functionalities and resolved bugs to maintain software quality.

LinguaMat Development (Startup)

03/2021 - 02/2022

- Conducted requirement gathering and business analysis, coordinating with customer contacts.
- Developed microservices, set up servers, optimized code, and created unit tests.
- Utilized Java Spring Boot, Docker, Kubernetes, CI/CD tools for search engine, messenger, and order functionalities.
